PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with deep expertise in modern PHP ecosystems (**Laravel**, **CodeIgniter**), **Vue.js**, and relational database architecture (**MySQL**, SQL Server). Experienced in building scalable cloud solutions, designing high-performance RESTful APIs, and refactoring legacy MVC architectures using **Clean Code and SOLID principles**. Proficient in leveraging advanced AI-assisted engineering workflows (**Cursor**, **Claude**, **GitHub Copilot**) to accelerate development speed, perform code refactoring, and maintain robust system quality and security.

EDUCATION

Bachelor's in Information Technology, Lebanese International University (LIU)
2011 – 2014 | Sana'a, Yemen
Graduated 1st in Class (Distinction, CGPA: 3.78)

High Diploma in Computer Programming, Sana'a Community College
2007 – 2010 | Sana'a, Yemen
Three years high diploma in computer science with 86.00%

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Software Engineer
June 2025 – Present | Sana'a, Yemen

- **Cloud POS & ERP Engineering:** Engineered full-stack cloud web applications and modular POS/inventory platforms utilizing **Laravel**, **CodeIgniter**, and **Vue.js**, featuring hardware barcode scanner integrations, dynamic stock reconciliation, and responsive UI components.
- **AI-Accelerated Development:** Integrated modern AI engineering workflows (**Cursor IDE**, **Claude**, **GitHub Copilot**) to streamline feature development, automate edge-case testing, and accelerate legacy code refactoring while maintaining high architectural accuracy.
- **Clean Code & Architecture Modernization:** Audited, restructured, and refactored legacy PHP (CodeIgniter/MVC) codebases into decoupled, maintainable services adhering strictly to **Clean Code** and **SOLID principles**.
- **API & Security Architecture:** Designed scalable, high-throughput **RESTful APIs** protected by strict authentication (Sanctum/JWT), granular role-based access control (RBAC), and adherence to OWASP security standards (XSS, CSRF, input sanitization).
- **Database Optimization & Performance:** Modeled and tuned complex **MySQL** relational schemas, implementing query refactoring, indexing strategies, and transaction safeguards to ensure fast query execution and data integrity under high-volume business transactions.

GTG Trading Group, Assistant to the Head of the Commercial Sector & IT Specialist
January 2024 – September 2025 | Sana'a, Yemen

- Supported technical operations and commercial automation platforms, analyzing workflows to improve operational efficiency across business units.
- Managed internal business databases and data integrity, running SQL queries and generating analytical reports for commercial leadership.
- Coordinated digital campaign infrastructure, landing pages, and web asset maintenance to strengthen market presence.
- Maintained secure internal network protocols and access control policies for organizational systems.

MODERN ARAB GENERATION INTERNATIONAL SCHOOL, IT Specialist
September 2019 – April 2023 | Kuala Lumpur, Malaysia

- Administered academic IT infrastructure, learning management systems (LMS), and educational databases serving staff and students.
- Audited institutional software landscape to deploy, integrate, and configure secure digital academic tools.
- Automated service tracking workflows via ticketing systems, managing user permissions and access control.

DOT DESIGN, Web Developer
August 2014 – September 2017 | Sana'a, Yemen

- Developed and deployed dynamic web applications and client portals using **PHP (Laravel & CodeIgniter)**, MySQL, JavaScript, HTML5, and CSS.
- Implemented MVC architectural patterns to separate business logic from presentation, streamlining maintenance and code clarity.
- Structured relational databases in **MySQL**, designing efficient queries, indexes, and stored routines for dynamic content management.
- Conducted routine site audits, cross-browser compatibility checks, and security updates across diverse client projects.

COURSES

SMART CITY: IOT SOLUTIONS AND EMERGING TECHNOLOGIES, NATIONAL UNIVERSITY OF SINGAPORE - NUS
2019 | Singapore
25 – 29 OF NOVEMBER 2019. (NATIONAL UNIVERSITY OF SINGAPORE - NUS)

AWARDS

Ministry of Higher Education Certificate of Achievement
2014
Recognized by the Minister of Higher Education for designing and implementing the official Student Scholarship Management System

Certificate of Volunteer Trainer, Lebanese International University
2013
Conducted hands-on academic training workshops in C++ and Java programming for undergraduate students

TECHNICAL & PROFESSIONAL SKILLS

Backend Engineering & Architecture
- Frameworks & Languages: PHP, Laravel, CodeIgniter (MVC).
- Core Architecture: RESTful API Design & Integration, OOP Design Patterns, Clean Architecture, Refactoring.
- Code Quality & Standards: Clean Code practices, SOLID Principles, Modular Component Design.

Frontend Engineering
- Core & Frameworks: Vue.js (Vue 3, Pinia/Vuex), JavaScript (ES6+), HTML5, CSS3/SCSS.
- UI/UX & Styling: Tailwind CSS, Responsive & Mobile-First Design, Cross-Browser Compatibility, Web Accessibility.

Database Design & Performance
- Database Engines: MySQL, Microsoft SQL Server.
- Data Management: Relational Schema Modeling, Query Optimization, Indexing, Transaction Integrity (ACID), Data interchange (JSON, XML).

AI-Assisted Development & Automation
- Modern AI Tooling: Cursor IDE, Claude (Anthropic), GitHub Copilot, Google Gemini.
- Workflow Impact: AI-driven Code Generation, Automated Refactoring, Test-Case Generation, Accelerated Bug Triage & Debugging.

Cybersecurity, Infrastructure & DevOps
- Web Security: OWASP Top 10 Mitigation, Data Sanitization, CSRF/XSS Prevention, Role-Based Access Control (RBAC), Secure Authentication (Sanctum/JWT).
- Version Control & Environments: Git, GitHub (Feature Branching, PRs), Postman API Testing, Apache/Nginx, Linux/VPS Environment Management.

Engineering Practices & Execution
- Methodologies: Agile / Scrum, Sprint Planning, Task Prioritization.
- Delivery: Technical Documentation, Asynchronous Team Collaboration, High Autonomy in Remote Workspaces, Rapid Problem-Solving Under High-Pressure Delivery Cycles.
